

About source code:

Java used jdk1.7.0_40

ML_Poject.java is a class which takes test webpage path and model path as input and predicts the class for it.

Vote.java weighted votes of SMO,J48 and Naïve Bayes models and predicts the class of the test files

Test.java is used to calculate accuracies on test data

s.bat is script file which contents all scripts for generation of models
with various parameters for tuning
place all .jar files in classpath

All models, data,outputlogs and arff files are placed in following link :
